

HP ProLiant DL385 G7 Server

Data sheet

Performance and flexibility that means business

Designed with virtualization in mind, the DL385 G7 Server features the latest 16-, 12-, and 8-core 6200 and 6100 Series AMD Opteron processors, and is ideal for demanding workloads that require high levels of performance. The ProLiant DL385 G7 Server comes with a 24-socket memory footprint and DDR3 Memory DIMMs, two embedded dual port Network Interface Cards (NICs), internal USB and Secure Digital (SD) card reader, and plenty of PCI expansion slots and internal storage making it well suited for a wide range of applications and environments.

The ProLiant DL385 G7 Server is expandable and flexible. Multiple drive cage options provide internal storage of up to 16 TB with 16 small form factor (SFF) drives or six large form factor (LFF) drives, 10 Gigabit NIC support, and a choice of two out of four PCI riser boards for I/O flexibility. The embedded modular smart array controllers deliver superior performance with the flexibility to seamlessly add cache and battery-backed write cache (BBWC) or flash-backed write cache (FBWC).

As always, you can rely on ProLiant for the best in industry-standard management, including HP Insight Control, HP Integrated Lights-Out 3 (iLO 3), and Trusted Platform Module (TPM) support—all designed to give you confidence in your business and the ability to squeeze every bit of productivity out of your server infrastructure. HP also helps you achieve power efficiencies within your environment, using technologies such as HP Power Regulator and Insight Control power management with Dynamic Power Capping. With over 11,000 ProLiant design and quality tests, you can increase server productivity for the long haul.

While the DL385 G7 is ideal for virtualization, its flexibility enables it to meet the demands of small business as well as enterprise environments. The server design balances flexibility, expandability, and energy efficiency. The combination of server design with the price/performance advantage of AMD Opteron processors makes the ProLiant DL385 G7 Server a cost-effective solution.

Key features and benefits

Enhanced performance

The ProLiant DL385 G7 Server now supports both Opteron 6200 and 6100 series processors. The processors include AMD Core Select, a feature that enables IT managers to turn off one or more software visible cores, helping them fine tune hardware for specific operating conditions and workloads. As a result, applications can benefit from increased memory bandwidth and cache per core.

- Up to two AMD Opteron 6200 Series 16-, 12-, or 8-core processors with 16 MB L3 cache or 6100 Series 12- or 8-core processors with 12 MB L3 cache provide power for demanding scale-out applications
- Two HP NC382i Integrated Dual Port Multifunction Gigabit Server Adapters (four ports total) free up PCI slots and support more virtual machines
- 24 DIMMs sockets for up to 512 GB of DDR3 memory—ideal for memory-intensive applications
- Support for up to 16 SFF or 6 LFF drives gives your system architecture room to grow
- Up to six PCI slots (PCIe Gen2) with optional PCI-X, x16, or dual-port 10GbE risers provide I/O flexibility

Virtual perfection

If you are looking for a reliable server platform for your virtualization projects, the ProLiant DL385 G7 Server is designed for you.

- Robust memory and NIC features support virtual machines and compute-intensive business needs
- HP Insight Control tools allow you to manage both virtual and physical IT through a single console
- Integrated VMware and XenServer virtualization technology and internal USB and SD Card Reader help you to deploy virtual machines easily and more securely

Essential management

When you select the ProLiant DL385 G7 Server as the core of your infrastructure, you are choosing to run your business with confidence. With its comprehensive management capabilities, the server can help you to take total control of your infrastructure, allowing you to respond quickly to your business needs. Insight Control featuring iLO 3 helps you reduce downtime and improve productivity.

- HP Insight Control is essential server management that allows you to deploy ProLiant servers quickly, proactively monitor server health and performance, streamline power confidently, and take complete remote control from anywhere
- HP Insight Control with Dynamic Power Capping technology enables you to improve your server capacity up to 3x by allowing you to fit more servers into your current power envelope
- Front-accessible Systems Insight Display helps locate hardware errors quickly and enables walk-up system diagnostics—saving administrators' time

Versatility and availability

The ProLiant DL385 G7 Server is engineered for reliability and ease of ownership, giving you flexible deployment options.

- The highly versatile 2U rack design offers flexibility and easy serviceability
- Choice of four modular configurations—including high wattage x16, legacy PCI-X, and dual port riser options—allows you to build your own I/O
- Expandable storage with support for up to 16 SFF or 6 LFF drives enables you to meet your storage requirements with ease
- For your internal storage needs, you can rely on any of the modular Smart Array storage controllers—the P410i comes standard in all models with seamless upgradability from zero memory to 1 GB FBWC
- The high-efficiency, common power slot strategy helps customers reduce their spares' inventory
- Hot-plug redundant power supplies and fans provide greater uptime
- The TPM option reduces data security concerns through its support for data encryption

Energy efficiency

The ProLiant DL385 G7 Server high-efficiency power options allow you to “right-size” based on your configuration requirements and save on energy costs. In addition, you can make use of HP Thermal Logic to take charge of power and cooling across your data center.

- Choice of four power supplies (460W AC, 750W AC, 1200W AC, or 1200W DC) gives you the ability to match your specific workload and significantly reduce power wastage
- Dynamic Power Capping—a feature of Thermal Logic technology—reallocates power and cooling resources by dynamically “capping” the power drawn by servers, helping you reclaim over provisioned energy
- Power regulator and power meter for ProLiant deliver integrated power monitoring and server-level, policy-based power management, with energy efficiency and savings on system power and cooling costs
- Power supply high-efficiency mode enables power supplies to operate with greater efficiency under all conditions

Ease of ownership

The ProLiant DL385 G7 Server is easy to own and manage, with industry-standard tools and components.

- Common ProLiant options and accessories enable you to better manage your IT and time
- A cable management arm and a quick deploy rail solution make racking a snap
- Tool-free chassis design enhances reliability and allows easy accessibility

Processors supported	AMD Opteron 6200 and 6100 Series
Number of processors	2
Processor cores	6200 series—16, 12, and 8 cores; 6100 series—12 and 8 cores
Cache memory	6200 series 16 MB Level 3 Cache; 6100 series 12 MB Level 3 Cache
Maximum processor speed	2.6 GHz 16- and 12-core; 3.0 GHz 8-core
Memory type	DDR3 Registered (RDIMM) and Unbuffered (UDIMM)
Maximum memory	512 GB Registered; 64 GB Unbuffered
Advanced memory protection	Advanced error checking and correcting (ECC), online spare
Storage type	Hot-plug 2.5-inch SAS/SATA Hot-plug 3.5-inch SAS/SATA
Number of hard drives	16 SFF (with optional second drive cage) or six LFF (with optional drive cage)
Removable media bays	1
Expansion slot	Six (6) PCI slots—(PCIe Gen2) optional PCI-X/PCI-Express, x16 PCI, or dual port risers
Storage controller	Embedded Smart Array Controller: P410i/1 GB FBWC (performance); P410i/256 (base); P410i (entry/HE)
Deployment	
Form factor	Rack
Rack height	2U
Networking	Two HP NC382i Integrated Dual Port Multifunction Gigabit Server Adapters (four ports total)
Infrastructure management	HP Insight Control (standard on performance models)
Server management	HP Insight Control featuring Integrated Lights-Out Advanced
Redundant power supply	Redundant standard on performance models, optional on entry and base models
Redundant fans	Redundant standard
Warranty	3-year parts, 3-year labor, 3-year onsite

Ideal environment

Environments of all types and sizes

While the ProLiant DL385 G7 Server is ideal for virtualization, it is flexible to support any business need in many environments—from corporate data centers to sophisticated small and medium businesses (SMBs).

- With its large internal storage capacity of up to 16 TB, the server is well-suited for everything from Web applications to databases
- It can be easily connected to storage networks and managed from one place—reducing manageability time

Space-constrained corporate data centers and service providers

- The DL385 G7 packs the storage, memory, and I/O you need into only 2U of rack space
- Availability features such as hot plug redundant power, advanced ECC memory, and hot plug redundant fans keep environments up and running and users productive

Sophisticated SMB locations

- The ProLiant DL385 G7 Server is not just for enterprises; SMBs with rack environments that can benefit from remote server management or network backup should consider it

The ProLiant DL385 G7 Server is well suited for:

- Virtualized environments
- Server-based computing
- Medium-scale mail and messaging
- Web and application server
- Small to medium databases
- Terminal services (Citrix)
- File and print
- Data center utility
- Computer-aided design (CAD), digital content creation (DCC), and visualization applications

HP Financial Services

HP Financial Services provides financing and financial asset management programs to help you cost-effectively acquire, manage, and ultimately retire your HP solutions. For more information, visit: www.hp.com/go/hpfinancialservices.

HP Services

When technology works, business works

The challenge of virtually every IT organization is similar—to develop and maintain an agile, efficient server infrastructure that delivers the service levels for your business needs.

HP Technology Services offers a comprehensive portfolio of HP Care Pack Services to help design, deploy, manage, and support your IT environment, enabling cost-effective upgrades to standard warranty with easy-to-buy and easy-to-use support packages.

Minimum recommended HP Care Pack offerings

- 3-year, same business day, 4-hour response onsite, 24-hour, 7-day coverage, hardware support.
- Hardware installation plus operating system installation and startup.

Enhanced service level Care Pack offerings

- Three-year Support Plus 24: Integrated 24x7 hardware and software operating support.
- Proactive Select: Access to HP technical consultants. Purchase service credits and obtain expertise when needed.

Benefit from HP Care Pack Services that help you

- Reduce deployment time and manage ProLiant server solutions smoothly and efficiently.
- Increase uptime and performance of server availability to your business.
- Detect, diagnose, and repair problems quickly to save time, money, and resources.

For more information, visit: www.hp.com/services/proliantservices or www.hp.com/go/proliant/carepack.

If you are looking for a reliable server platform for your virtualization projects, the ProLiant DL385 G7 Server is the ideal choice. To learn how the server helps you deploy more virtual machines with greater confidence and provides value for your money, visit www.hp.com/servers/dl385-g7.
